Nairobi, Kenya

## PROFESSIONAL SUMMARY

Results-driven Computer Science graduate and versatile professional with hands-on experience in backend software development and administrative management. Skilled in building scalable web applications and APIs using Python, Go, and JavaScript, as well as managing institutional operations, student records, and financial processes. Adept at combining technical problem-solving with organizational efficiency to deliver value in both technology and operations environments.

## WORK EXPERIENCE

### School Administrator

Jan 2022 – Present

*Transtar Comprehensive Academy | Kisumu, Kenya*

- Manage and maintain comprehensive student and staff records, ensuring accuracy and confidentiality of all institutional data.
- Oversee fee collection and receipting processes, reconciling payments and generating financial reports for management.
- Coordinate day-to-day school operations including timetabling, admissions, and communication between staff, students, and parents.
- Maintain administrative documentation including enrolment registers, staff contracts, and compliance records.
- Support management in planning school events, examinations, and academic calendar activities.

### Backend Developer Intern

May 2024 – July 2024

*Adamur (Startup) | Nairobi, Kenya*

- Developed and maintained a web application using Python, Django, and Django REST Framework to manage user projects and milestones.
- Integrated third-party services including GitHub (collaboration), Paystack (payments), and Slack (communication).
- Designed and implemented an invite system that increased user acquisition and platform engagement.
- Built an email notification system improving user communication and retention.
- Integrated OpenAI APIs to automate project milestone generation from textual descriptions.
- Built and documented RESTful API endpoints consumed by the frontend application.

### Clerk – Polling & Tallying Center

2026 (Bi-Election)

*Independent Electoral and Boundaries Commission (IEBC) | Kenya*

- Served as an official IEBC clerk during a national by-election, supporting the integrity of the electoral process.
- Responsible for charging and updating KIEMS (Kenya Integrated Elections Management System) kits prior to and during polling day.
- Received and accurately recorded polling station result updates at the tallying center, ensuring timely and error-free data capture.
- Maintained strict confidentiality and adhered to IEBC procedural guidelines throughout the electoral exercise.

## NOTABLE PROJECTS

### FgTrailers – Trailer Rental Management System

Oct 2025 – Ongoing

*Python, Django, PostgreSQL, Redis, Docker, React, Next.js*

- Developed a REST API with JWT-based authentication to manage users, contracts, and signing workflows.
- Integrated DocuSeal for contract creation, signing, and tracking; generated dynamic PDFs using WeasyPrint.
- Implemented Celery and Redis for background tasks such as email delivery and document generation.
- Integrated n8n to trigger and manage email workflows based on system events.
- Built a Next.js frontend handling authentication and multi-step contract flows; containerized with Docker.

RidesKe – Bodaboda Verification System

Jan 2025 – Mar 2025

Go, PostgreSQL, Redis, Docker, GitHub Actions

- Developed backend services in Go to manage rider registration, OTP-based verification, and document submission.
- Integrated SMS-based OTP authentication and used Redis for caching short-lived session data.
- Integrated Cloudinary for secure profile photo uploads; deployed on Heroku with Docker and GitHub Actions CI/CD.
- Collaborated with the Android team to align API structure and verification logic with the mobile frontend.

Smart Biodigester Platform

May 2025 – Jun 2025

Supabase, Next.js

- Built a Next.js frontend dashboard to display real-time biodigester metrics (pH, pressure, temperature).
- Retrieved and rendered live sensor data from Supabase; implemented UI components for alerts and data visualization.
- Collaborated with the IoT team to align frontend data handling with incoming sensor payloads.

EDUCATION

Bachelor of Science in Computer Science

Sep 2021 – Dec 2025

Masinde Muliro University of Science and Technology | Kakamega, Kenya  
Second Class Honours, Lower Division

Kenya Certificate of Secondary Education (KCSE)

2019 – 2022

Otieno Oyoo High School | Grade: B Plain

Kenya Certificate of Secondary Education (Form 1–2)

2017 – 2019

Ombeyi Secondary School

Kenya Certificate of Primary Education (KCPE)

– 2017

Maseno Mixed Primary School | Score: 375/500

TECHNICAL SKILLS

**Languages:** Python, Go, SQL (PostgreSQL), JavaScript, TypeScript, HTML/CSS  
**Frameworks & Libraries:** Django, Django REST Framework, Flask, React, Next.js  
**Developer Tools:** Git, Docker, GitHub Actions, Postman, Redis, Celery, Supabase, NeoVim  
**APIs & Integrations:** OpenAI, Paystack, DocuSeal, Cloudinary, Slack, GitHub API

INTERESTS & HOBBIES

Drawing • Software Development • Reading
